Post-Apollo inquiry

As you probably know much better than I do, the question of Discount Rate has become rather active again lately, perhaps in response to BOB A-94. I ran across several items in the Congr. Rec., e.g.:

Proxmire	7/2	S7754
Waldie	7/7	H5611
Proxmire	5-16	S5278

Slight change of subject: can you steer me to or (better) route me a copy of a recent NAS review of remote-sensing and its potential economic payoff. This is as precise a reference as I have, but I was sure you'd recognize it.

Yours
J. Lederberg
